Continuation of 3. NOTE: Applicant proposes to add a new independent claim that recites, "...the grooves form a plurality of patterns comprising at least one of circular shapes and polygons..." This recitation appears to come from claim 3 which recites, "the surface of the bulb includes a plurality of patterns having one of a circular shape, a triangular shape, and a polygonal shape..."

It appears that applicant proposes to (1) remove a triangular shape from the list of shapes and (2) recite the grooves forming the plurality of patterns, instead of the plurality of patterns being formed on the surface of the bulb. Since the claims were not previously examined with these new recitations in mind, further consideration and/or search is required.
